

KEY MACHINES

General Information

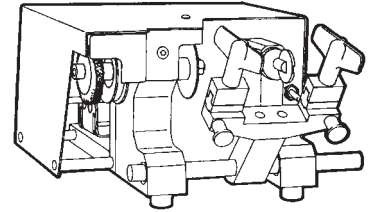

Framon #2 Code Machine

The Framon #2 comes with everything you need to originate almost any cylinder key in use today. Included at time of purchase are four cutters, five spacing blocks, dial calipers, the latest Depth & Space Manual, and a demonstration video. The #2 features unsurpassed accuracy of .0005", all aluminum and steel construction, and a one-year, parts, labor and freight warranty.

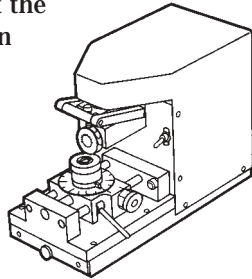

DBM-1 Flat Steel Key Duplicator

The DBM-1 is designed to quickly and accurately duplicate safety deposit box, locker, and corrugated padlock keys. It can accommodate blanks up to 2-1/2" long. Standard with the DBM-1 is a .045" carbide cutter and a wire deburring brush. The rotating guide can accommodate cutter widths from .035" to .100".

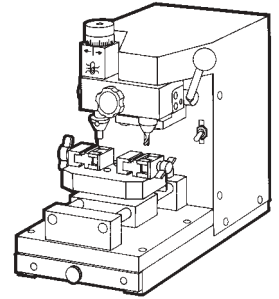

TKM-100 Tubular Code Machine

The TKM-100 is known throughout the industry as the foremost machine in tubular key cutting. All three size tubular keys can be cut with the TKM-100 at time of purchase. Two double-sided depth cams and seven spacing plates cover almost any tubular key in the field. Also included with the TKM-100 at time of purchase is a tubular code book and a dial indicator for decoding keys.

Sidewinder High Security Key Duplicator

The compact Framon Sidewinder is designed to easily duplicate automotive high security keys such as Mercedes 2 & 4 track, BMW, Lexus, Infiniti and Volvo. Dimple keys can also be cut on the machine with optional kits. Four cutters are included with the machine, as well as a free 50 high security key assortment. The Sidewinder is backed by a one-year, parts, labor and freight warranty.

Detailed specifications on the key machines shown here are available on request. Parts and accessories are available. All machines shown are available with 110VAC, 12VDC or 220 VAC motors.

KX-1 Code Machine

The KX-1 is Framon's revolutionary new code machine designed for locksmiths looking for speed and accuracy. The KX-1 utilizes depth and space cams and a spring loaded carriage to cut keys accurate to .0005" in about 15 seconds. Cams are available for the KX-1 for manufacturers such as Arrow, Assa, Best, Kaba, Medeco, Sargent, and Schlage. To switch from one manufacturer to the next, simply remove a screw and install the new cam. The KX-1 comes with one set of cams and the proper cutter at time of purchase. Cams & cutters are optionally available individually or in kit form. Please contact us for details.
