

General Information

Multi-Lock File Cabinet Locking Bars

- Multi-point Locking Design.
- Spring-open action – easy one motion opening.
- No storage or accident issues – swings out of the way and remains attached to the cabinet.
- Easy installation – opening of file drawers is unnecessary during installation.
- Meets DOD requirements for safeguarding classified information.

Multi-Lock file cabinet locking bars make securing file cabinets simple. A slight upward motion of the red inner slide bar releases all locking points allowing the spring loaded bar to gently swing out of the way. The compact design of Multi-Lock bars gives sufficient clearance for unrestricted access to adjacent file drawers when locked or unlocked.

Bars are shipped standard for installation on the left side of a file cabinet. You can easily reverse the inner slide for application on the right side. Sheet metal screws are provided.

Constructed of 16 gauge formed steel, these locking bars have a durable, powder-coat acrylic enamel finish. The inner slide bar interlocks with a locking lug at each drawer opening when in the locked position providing added security.

MODEL	DESCRIPTION	OVERALL LENGTH	WEIGHT
ML-1	1 Drawer locking bar	11"	.88 lb.
