STANDARD

Material

Heavy-duty 14 Gauge stainless steel

Finishes

US32D Satin Stainless Steel (630)

Cycle Testing

Grade 1

ANSI/BHMA Standard A156.26

Mounting Hardware

No exposed mounting fasteners when closed Universal screw pack

Capacity

Supports weights up to 600lbs. 4'0" maximum door width

Sizes

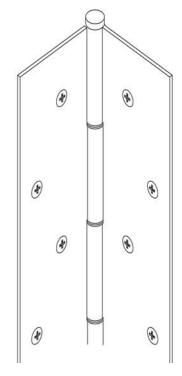

6'8", 7'0", 7'2", 8'0", 10'0"

Hole Pattern

Symmetrically templated Non-handed

Barrel Type Hinge

1/4" diameter stainless steel pin Long-life split nylon bearings

Fire Rating

3 hours- hollow metal doors mounted singly

90 minutes- hollow metal and composite core wood fire doors

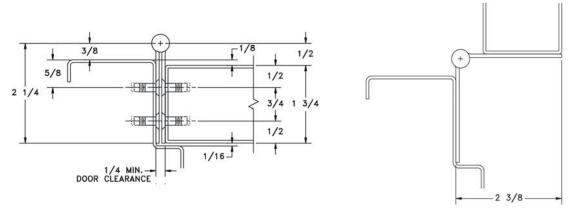

20 minutes- wood doors

Classified in accordance with UBC code standard 7-2 for positive pressure

This edge-mounted pin & barrel type hinge is used on many of today's high traffic, high abuse doors. The hinge works well in locations that used anchor hinges, pivot reinforcement hinges or thrust pivot unit and hinge sets. This hinge saves on special door and frame preparation charges and makes the installer's job easier. It can be used on both fire labeled and non-labeled openings.

Concealed current transfer – suffix hinge "CE-8D"

This is the greatest continuous hinge ever engineered. This unique design answers the problem of adjusting doors where frames are not installed plumb or properly aligned. Not only that, but the wrap-around edge guard protects the door from unsightly dents and gouges and will deflect objects, preventing further damage. Strategically located fasteners coupled with the AdjustaScrew fastener allow the door to be adjusted up to 3/8" within the channel of the hinge and distribute the load of the door down the entire length of the jamb. The proper alignment of the door to the frame will allow your closers, panics magnetic locks, electronic strikes, and automatic operators to assist you in meeting all your life safety code requirements.
